Observations... From Around Town

(BY JAY WHOZIT)

Results from Tuesday's election showed that Congressman William M. Colmer had been reelected to serve his eighth consecutive term of office as a member of the United States Congress. From the Sixth Congressional District of the State of Mississippi... congratulations, Bill... between this week and next week all the schools of the city will have opened for registration of students for the 1948-49 term, and by September 8th all will have returned to regular class work... this summer season is fast drawing to a close, and with the remaining scars from the terrific damage wrought by the September hurricane, together with the burning of the highway bridge in June, this has been one of the dullest summer seasons the Mississippi Coast has seen in many, many years, truly we've had our share of hard knocks, but let's not look back at the past and bemoan our bad luck, rather let's look forward with renewed vigor for prospects of a brighter future... the Little Theatre organization isn't letting any grass grow under their feet—again next week, on September 2, 3, and 4th they will present another play "Arsenic and Old Lace" at their new red playhouse on Boardman Avenue... the new California style home built by C. C. McDonald, Jr., on Ramoneda Street was opened for inspection on last Saturday and Sunday, and for the benefit of those who did not get a chance to view this new dwelling it will again be open to the public this Sunday... the delinquent realty tax rolls of the City of Bay St. Louis and Hancock County are published in this issue, for the first of four consecutive publications, necessary according to law, before the property delinquent for taxes can be sold at public auction... when you look and see what a wonderful successful the real estate development of Pass Christian Isles, just two miles across the Bay on Henderson Point has been, you can't help but wonder why one of our local real estate dealers does not wake up to the fact that the same success can be accomplished right here on our side of the Bay and in our own town... we have as much to offer here, as anywhere else, all it takes is a little nerve and for our local folks to come out of the trance they've been in for so long, this is not the season for hibernating... in Louisiana this week an eight-year old child, playing with matches started a fire which caused \$85,000 damage—this should be a lesson to all youngsters who have the habit of playing with fire and to parents who allow their children to do so... young man, if you were born in the year 1922, after August 30, 1922, you must register on this Monday, August 30th, at the Court House for Selective Service, so don't forget... The University of Mississippi, according to an announcement made this week, will offer an introductory course in radiochemistry this fall. Prof. G. H. Brown, who will instruct the course, said that it will appeal to students interested in atomic energy work and would explain many fundamental practices which are part of the Oak Ridge daily routine.

William Colmer Elected To Congress Eighth Consecutive Time

Defeats Grover Doggett For Second Time By A Majority Of More Than 7000 Votes—Carried County By Majority of 216 Votes

William M. Colmer was elected for the eighth consecutive time, to represent the people of the Sixth Congressional District of Mississippi, in the halls of Congress, in Tuesday's primary election, over Grover C. Doggett of Laurel, Miss.

Mr. Colmer's majority in the District was over seven thousand votes, and in Hancock County his majority was 216 votes.

There were ten thousand less votes polled in the District at this election, than were polled in the election of two years ago, at which time Mr. Doggett also opposed Mr. Colmer. Mr. Colmer's majority at that time was less than 5000 votes.

Following his reelection Mr. Colmer issued the following statement: "Naturally I am extremely grateful to the people of the Sixth Congressional District for the splendid and overwhelming vote of confidence which they gave me in Tuesday's election."

The opportunity which this afforded for service in the next two critical years of course carries with it a purely political point of view, the gratification that comes from victory belongs to my friends.

I assure them and the people of South Mississippi that I shall continue in the future, as in the past to endeavor to conduct myself as their representative in such a way as to reflect honor upon them.

The results of the precinct vote in Hancock County was as follows:

Mississippi Forest Service Complete Marking Of Trees In Kurtz State Forest For Timber Sale

Personnel of the Mississippi Forest Service under the supervision of M. O. Stark, Forest Management Director, have just completed marking trees to be cut on the W. W. Kurtz, contains 1,700 acres of well stocked timber, Mr. Leggett states.

The timber was marked on a selective cutting basis with each tree to be cut marked with a paint spot at head height and another below stump height. The mark at head height is to enable timber cutters to locate marked trees and the mark below stump height is enable forestry officials to check behind the cutting to determine that only marked trees have been cut.

matic and romantic, but it covers three distinct age periods. In the opening sequences the actress plays a 15-year-old girl. Later she is a young lady of 18. And in the latter part she is a sophisticated woman of 29.

"Letter From An Unknown Woman" is a love story Joan has wanted to make ever since she first read it several years ago. Consequently when she and her husband, William Dozier, formed Rampart Productions, this was the first story property they acquired.

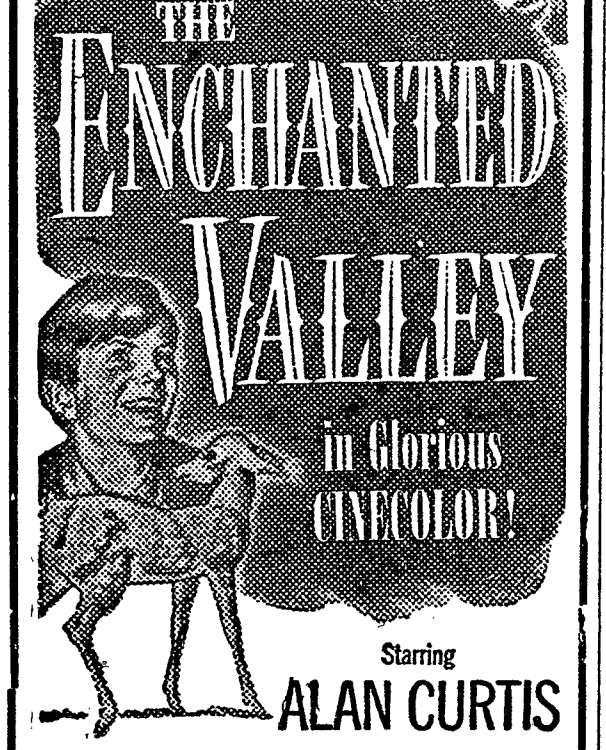

Louis Jourdan, much-talked-about French newcomer, is co-starred with Miss Fontaine.

ELEANOR PARKER
DOUBLES IN "THE
WOMAN IN WHITE"At the A. & G. Theater
Thursday and FridayPlaying the dual role is considered
an unusual triumph for an actor
in Hollywood.Ever since John Barrymore flash-
ed across the screen as father and
son in the epochal "Don Juan" the
dual part has been coveted as an
unusual test of acting ability.

Eleanor Parker, who stars in the

twin characterization from Wilkie
Collins great mystery novel of the
mid-19th century. "The Woman in
White" now joins the thin ranks
of actors who have portrayed two
characters in the same film.Douglas Fairbanks, Jr., won fame
for his two roles in "The Corsican
Brothers." Ronald Coleman did
double duty in "The Prisoner of
Zenda," Mary Pickford was out-
standing in "Little Lord Fauntleroy."Danny Kaye, Cornel Wilde, Nor-
ma Talmage, Olivia de Havilland,
Elizabeth Bergner and Spencer Tracy
are other Hollywood actors and
actresses who have won renown de-Neat Sum Realized From

Bette Davis reached a new high
with her twin-sister characteriza-
tion in "A Stolen Life."In "The Woman in White," which
comes Thursday and Friday to the
A. & G. Theater, Eleanor Parker
assumes two completely dissimilar
roles. In one she is a hopelessly
insane girl who wanders the moors.
In the other she is a lovely young
noblewoman who is forced into an
evil marriage and nearly killed for
her fortune."The constant switch of charac-
ter which is brought about by
shooting schedules doesn't help an
actress much in her handling of
twin parts," Eleanor admits. "She
must divide her thinking—if she is
going to live the parts, that is—into
two parts taking the right one for
each character and jumping back
and forth without getting confused."

Naval Activities in Mississippi Transferred To Sixth District

New Orleans, Aug. 24—Annexation of a four-state area now in the Eighth Naval District by the Sixth Naval District was almost completed this week with final transfer of files and other administrative paraphernalia.

Official turnover of naval activities in the states of Tennessee, Mississippi, Alabama and extreme Florida to the Sixth District will come on Sept. 1, Capt. Charles B. McVay, 3d., USN, acting eighth district commandant, said at headquarters here.

Sixth district headquarters are at Charleston, S. C., with Rear Admiral R. W. Hayler, USN, as commandant.

The move ordered for economy and closer administrative liaison with other armed force commands, will mean no change in the status of giant naval air activities at Memphis, Tenn., and Pensacola, Fla. Both are administered by naval air commands separate from the district setup.

Chief result of the shift will be the placing of responsibility for Naval Reserve activities in Southern states east of the Mississippi river under the east-coast command.

Thirty-seven organized reserve divisions six companies of reserve SeaBees, 32 volunteer units and 63 specialized reserve corps units are affected.

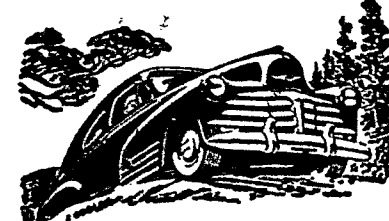

—Friends there are in receipt of messages from Miss Mae Colson and her mother who are visiting Robert Colson and family at Long Beach, California. They will go later to San Francisco and from there will go to Chicago.

Miss Joyce Necaise is a medical patient at the hospital.

James McArthur of Pearlington was treated for a broken arm and then removed to the Marine Hospital in New Orleans. Mr. McArthur was fishing, it was said, and on entering his boat he tripped and fell in the boat.

DEEPER DRILLING

MEANS More Gas FOR YOU

Nearly 70 per cent of all the proven gas reserves of the nation are right here in Mississippi, Louisiana and Texas. Geologists tell us there are still more deposits of gas at deeper levels—a fact that is being borne out by test drilling in many sections of the Gulf South.

Union Producing Company, a part of the United Gas family, has drilled many deep wells—some productive, some dry. One in Warren County was drilled to a depth of 11,719 feet—a distance equal to the height of nine Empire State buildings stacked one on top of the other!

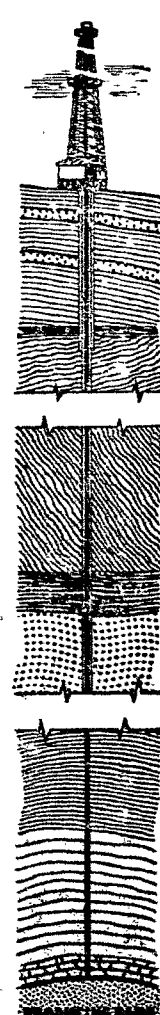

Each year, a substantial part of our budget is earmarked for exploratory drilling and drilling in proven fields. This is one of many functions of the United Gas organization...all of which have the ultimate purpose of assuring a continued dependable supply of natural gas for our customers.

UNITED GAS

Serving the

Gulf South

Formations favorable for the presence of oil or gas are determined by geologists and seismograph crews. A location is selected, a derrick erected, drilling machinery rigged up, and the new well is begun, or "spudded in."

A string of pipe of large diameter is cemented in the upper part of the hole to protect against cave-ins or contamination of freshwater sands. Heavy fluids, called "mud," are pumped down through the drill pipe. As they flow back up through the hole, they carry cuttings and at the same time guard against blow-outs at all times.

Formation samples, or "cores," are taken from the hole at various depths, and are carefully examined in every detail in field and laboratory. Oil and gas are found only in porous formations, sealed off by impervious strata.

**SPEEDING AIR PARCEL
POST SERVICE SEPT. 1**

The advent of speedier nationwide air parcel post service September 1 brings back to minds of old-timers the introduction of similar surface operations 35 years ago. It was in 1913, according to Postmaster Ford of Bay St. Louis, that parcel post first made its appearance in the United States.

The service at that time was established primarily to aid farmers and hamlets, located off the beaten paths, in expediting their products to market and, in turn, receiving sorely needed goods from larger cities. However, mail order houses and other establishments were quick to realize its value.

Transportation facilities in those days were still slow and tedious. Motor-driven vehicles were few and the roads which they traversed were frequently impassable. Too, trains were giving off more sparks and smoke than speed. There were no commercial planes in those days, either, and only the foolhardy envisioned the rapid approach of this air age.

Then it took days to transport parcel post packages across the country. Some parcels were forced to go by virtually every movable conveyance before they reached their destination—particularly to the more remote sectors.

From that modest beginning, parcel post has grown to become an integral cog in the far-flung American postal operations. Its annual

postage, keeping step with the progress of transportation, has soared from a few million to billions of pounds of assorted commodities.

Still determined to employ the fastest means of transportation to move the mails, the Post Office Department will add the link necessary to give the United States the world's most highly specialized doorstep delivery service with the launching of the new nationwide worldwide air parcel post, said Postmaster Ford.

Keep The Movies Clean!

Folks in our town often spend an evening down at Proctor's Theatre, enjoying the pictures with their wives or husbands. So naturally we're all in accord on the movie distributors' program of self-regulation, by which they check all films to be released, and weed out undesirable screenplays.

It's only smart for an industry that serves the public to present its product in a good light—and thereby earn the gratitude and good will of its customers.

Take the brewers, for example. Like the movies, they have their program of "Self Regulation"—by which retailers selling beer are regularly checked on—to make sure they maintain decent standards.

The brewers help the authorities weed out any offenders—so that temperate people who enjoy a moderate beverage like beer can be sure of courteous and clean surroundings. This cooperation in keeping beer outlets decent and law-abiding cannot be assured where the legal sale of beer has been voted out.

Little Theatre Rehearsals Progressing Well

"Arsenic and Old Lace," now under rehearsal at the Little Theatre Playhouse on Boardman Avenue, is rapidly whipping into shape, according to its director, Mrs. Anna Nachman, who expresses real enthusiasm over the outcome of the hard work her cast is doing. The unusually difficult set for the comedy is under the direction of Mrs. Ruth Luderbach, and the tricky make-up will be done by Mrs. Mary Hatcher and Mrs. Elsie Bertucci.

Tickets for "Arsenic and Old Lace" will be issued to Little Theatre members by mail as usual, and non-members may purchase them a few days in advance at the Beach Drug Store or at the ticket office each night of the performance. The comedy, the fourth play of the 1948 season, will be presented on the nights of September 2nd, 3rd and 4th.

Mrs. Carlo Pisciotto, the former Miss Rosemary Piazza, daughter of Mr. and Mrs. Anthony Piazza, who was recently married at St. Augustine church in New Orleans.

ness all his life, and not withstanding he is a man of young years, his knowledge of the profession extends to a wide range. In Hancock County he is a friend of some of the most influential and solid citizens. Mr. Hart is doing well with the Progress and The Echo gladly notes the fact because we believe in "live and let live."

Mr. and Mrs. Paul Chauvet announced the birth of a daughter.

Mr. Frank J. Ladner announced his candidacy for the office of Sheriff of Hancock County.

Again I choose to quote in full an item that seemed to be timely to the editor of long ago and which I think still applies to the newspaper men of today. "Newspaper men always know more than they write; they always shield more than they expose; they are always more merciful than cruel. The man who trusts a newspaper man may rely upon the fact that he will be treated fairly. It is the mean contemptible, suspicious hypocrite that the newspapers are after. No manly man was ever hurt by a newspaper, and no one is quicker to see the manner of a man who studies men and actions day in today."

Miss Lizette von Gohren returned from Mobile where she visited her sister.

The marriage of Miss Rose Tudury and Mr. J. Druhan was announced and took place on March 19, 1895.

Assistant Postmaster and Mrs. Tudury announced the birth of a son.

"As a rule, the editor, who sometimes says ugly things of you, is your best friend and will show you your erring ways."
